❖ **Summary of the industry in which our Company operates:**

AGRICULTURE INDUSTRY

INTRODUCTION

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India’s population. India has the world's largest cattle herd (buffaloes), the largest area planted for wheat, rice, and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. The agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country’s population. Thus, farmers become an integral part of the sector to provide us with a means of sustenance.

The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

Foodgrain production in India touched 330.5 million metric tonnes (MT) in 2022-23 (3rd Advance Estimate). India is the world's 2nd largest producer of food grains, fruits and vegetables and the 2nd largest exporter of sugar. A total of 521.27 LMT rice has been anticipated for procurement for the upcoming KMS 2023-24, up from 496 LMT produced during the previous KMS 2022-23

MARKET SIZE

According to Inc42, the Indian agricultural sector is predicted to increase to US\$ 24 billion by 2025. Indian food and grocery market is the world's sixth largest, with retail contributing 70% of the sales. The first advance estimate for FY25 indicated a food grain production of around 165 million metric tons. In FY24, India produced over 332 million metric tons of food grains.

The total Kharif food grain production for 2024-25, according to the First Advance Estimates, is projected at 1647.05 Lakh Metric Tonnes (LMT), marking an increase of 89.37 LMT from the previous year and 124.59 LMT above the average Kharif food grain production. Rabi crop area has from 709.09 lakh hectares in 2022-23 to 709.29 lakh hectares in 2022-23. In 2022-23 (as per the second advance estimate), India's horticulture output is expected to have hit a record 351.92 million tonnes (MT), an increase of about 4.74 million tonnes (1.37%) as compared to the year 2021-22.

The Agriculture and Allied industry sector witnessed some major developments, investments, and support from the Government in the recent past. Between April 2000-September 2024, FDI in agriculture services stood at Rs. 26,836 crore (US\$ 3.11) billion. According to the Department for Promotion of Industry and Internal Trade (DPIIT), the Indian food processing industry has cumulatively attracted a Foreign Direct Investment (FDI) equity inflow of about Rs. 1,11,831 crore (US\$ 12.96 billion) between April 2000-September 2024. This accounts for 1.83% of total FDI inflows received across industries. During 2024-25 (April-May), processed vegetables accounted for US\$ 122.91 million, miscellaneous processed items accounted for US\$ 302.07 million and processed fruits & juices accounted for US\$ 143.51 million. India's exports of agricultural and processed food products rose by more than 11% YoY to Rs. 1,54,314 crore (US\$ 17.77 billion) during April-December of FY25.

Rapid population expansion in India is the main factor driving the industry. The rising income levels in rural and urban areas, which have contributed to an increase in the demand for agricultural products across the nation, provide additional support for this. In accordance with this, the market is being stimulated by the growing adoption of cutting-edge techniques including blockchain, Artificial Intelligence (AI), geographic information systems (GIS), drones, and remote sensing technologies, as well as the release of various e-farming applications.

The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

INTERNAL RISK FACTORS:

1. ***We do not maintain long-term contracts with our third-party suppliers, and our business may be adversely affected by a shortfall in supply, or increase in price of materials.***

Our company is engaged in the business of contract farming, wholesaling and supplying of agricultural commodities. For further details, see the chapter “Our Business” on page no. 111 of this Prospectus. While we have entered into long-term agreements with certain suppliers for a period of five years, we do not maintain such contracts with all our suppliers. As a result, a portion of our supply chain remains exposed to fluctuations in pricing and availability. We rely on third-party manufacturers for our products, and we do not have direct control over their manufacturing processes, quality standards, or hygiene practices. Consequently, there is a risk that the products we sell may be subject to deficiencies or inferior quality. Since we do not have long-term agreements with all our suppliers, we are required to procure products at prevailing market rates, which may be influenced by fluctuations in raw material costs, labor expenses, transportation charges, and manufacturing overheads. Any significant increase in these costs could impact our procurement prices, potentially leading to reduced profit margins. Furthermore, any disruption in the supply chain, whether due to price volatility, supplier constraints, or external factors, may affect the availability and pricing of our products. If we are unable to adjust our selling prices to compensate for rising procurement costs or if supply shortages lead to a decline in sales volume, our business operations, profitability, and financial performance could be adversely affected. In case of disputes, where a formal agreement exists, such agreement contains a dispute resolution clause providing that disputes shall be resolved by an amicable effort and of the dispute could not settle amicably then the same shall be resolved through arbitration. In the absence of long-term agreements, the transactions with suppliers are carried out based on purchase orders or mutual understanding from time to time. In the event of any dispute arising between our Company and the suppliers, the same is resolved amicably through mutual discussions and negotiations. Our Company endeavours to settle all commercial disputes through mutual understanding to avoid litigation and maintain smooth business relationships with our suppliers.

2. ***Our Company is substantially reliant on our Promoters, Managing Director & KMPs for mentoring and growth of our Businesses. Our inability to continue to receive such support from any of such persons in power and supervision could materially affect our Company's operations. Further, Our ability to attract, train and retain executives and other qualified employees is critical to our business, results of operations and future growth.***

Our present and future performance and success depend largely upon the guidance and supervision from our Promoters, Executive Director and other key managerial personnel and our ability to attract and retain them. In particular, our Managing Director, Mr. Ashokbhai Dhanajibhai Prajapati and other senior management team are critical to the overall management of our Company. Their inputs and experience are also valuable for the development of our services, our work culture and the strategic direction taken by our Company. Our Management, has built relations with suppliers, customers, and other relevant persons who are connected with us in the journey of our businesses. Our future performance will depend upon the continued services and support of these persons. Our business depends upon our employees for its successful execution. The specialized skills we require, especially for the verticals of our research and development activities. We may require a long period of time to hire and train replaced personnel when skilled personnel terminate their employment with our Company. We may be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting the skilled employees that our business requires. If we do not succeed in attracting well-qualified employees or retaining or motivating existing employees, our business and prospects for growth could be adversely affected.

3. ***The agro business is highly seasonal and such seasonality may affect our operating results and cash flow of our Company.***

Our company is engaged in the business of contract farming, wholesaling and supplying of agricultural commodities. The supply of product and sales volumes fluctuates based upon agricultural cycles, weather patterns, and market demand. The availability of fruits and vegetables is primarily influenced by traditional crop seasons in India, with a significant dependence on monsoon rainfall. Any variation in the timing, intensity, or distribution of rainfall can impact the supply chain, leading to irregular product availability and price volatility. We recognize revenue upon the sale of our products, and historically, trading volumes tend to be lower during harvesting and planting seasons, with

increased sales activity occurring afterward. During periods of lower sales, we continue to incur operating expenses, which may not be offset by corresponding revenue, thereby impacting our profitability and cash flow. Due to the inherent seasonality of our business, the financial performance of one reporting period may not be directly comparable to another. Additionally, any delay or disruption in supply caused by unexpected weather changes or shifts in demand patterns may defer sales from one financial year to the next, making annual financial results inconsistent. This seasonality poses a risk to the stability of our revenue and overall business performance.

4. *We are heavily dependent on certain suppliers and customers for procurement and sale of our traded goods. Any disruption in supply or offtake from such entities may affect our business operations.*

We are extremely dependent on our top 5 customers. Our top five customers contributed 51.90%, 76.37%, 97.61% and 70.75% of our sales for the financial year 2024-25, 2023-24, 2022-23 and for the six months ended 30th September 2025 respectively, whereas our top 5 suppliers contributed 56.95%, 75.22%, 22.43% and 78.26% of our purchase for the financial year 2024-25, 2023-24, 2022-23 and for the six months ended 30th September 2025 respectively. Any disruption of supply of raw materials from suppliers or loss of any of our top 5 customers will adversely affect our operations and financial position. We mainly procure our traded goods from various suppliers. We believe that the quality of products supplied, the transparent pricing, locational advantage, etc. are some of the major reasons, our Company prefers to procure our traded goods from these key suppliers. However, we have not entered into any formal agreement with these key suppliers. Any failure of the suppliers to deliver these traded goods in the necessary quantities or to adhere to delivery schedules or specified quality standards and specifications would adversely affect our business operations and our ability to deliver orders on time and at the desired level of quality. Further any deterioration in the financial condition or business prospects of these suppliers could reduce their ability to meet our requirements and which may result in delay of supply of our products. As a result, we may lose customers and incur liabilities for failure to execute orders, which could have a material adverse effect on our business, financial condition and results of operations and accordingly result in a significant decrease in our revenues.

5. *Our Company has not entered into any long-term contracts with our customers and we typically operate on the basis of orders received on hand. Inability to maintain regular order flow would adversely impact our revenues and profitability.*

We have not entered into any fixed contracts with our distributors/customers and we cater to them on an order-by-order basis. However, we have entered into a very few contracts with certain customers for a fixed term of 5 years; notwithstanding this, the majority of our sales are still conducted without formal contracts. As a result, our customers can terminate their relationships with us without any prior notice and without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's distributors/customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's distributors/customers are dependent on factors such as the customer satisfaction, quality consistency, fluctuation in demand for our Company's products and customer's inventory management. Although we place a strong emphasis on quality, pricing and timely delivery of our products, personal interaction by the top management with the distributors/customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

6. *The properties used by the Company for the purpose of its operations are not owned by us. Any termination of the relevant lease agreement or rent agreement in connection with such properties or our failure to renew the same could adversely affect our operations.*

The following premises are used by our company for the purpose of its operations:

Our operations are carried out from premises taken on lease from third parties, including our Registered Office, godowns, agricultural lands, and retail outlets. These leases are generally for a period of 11 months and 29 days and are typically renewed upon expiry, based on mutual consent with the lessors. However, there can be no assurance that such leases will be renewed or that new leases will be entered into on favorable terms, or at all. Non-renewal or early termination of any lease may require us to incur additional time and costs to identify and secure alternative premises. We may also face delays or operational disruptions in relocating, and the new premises may not be as suitable or commercially viable. Any such event could adversely affect our business operations, financial condition, and results of operations. Further, if vacated properties are leased or sold to competitors, it may intensify competition in those areas and negatively impact our market position. Although we do not frequently relocate our outlets, certain outlets have been closed or relocated in the past, as detailed in the table below.

Sr. No	Address of Outlet	Lease Tenure	Reason to relocate
1.	Shop 4, Gala Hub Anx, Bopal, Ahmedabad, Gujarat- 380058	11 months 29 days	The Company has closed the outlet as the terms offered by the lessor for renewal were not favourable
2.	Shop No. 1, Aditya Flats, Nr. Chandranagar Six Rasta, Narayan Nagar Road, Paldi, Ahmedabad, Gujarat- 380007 (Relocate at G. F. Shop-4, Kalash Five, Opp. Sabar Flats, Narayannagar Road, Chandranagar, Paladi, Ahmedabad- 380007)	11 Months 29 days	The Company has relocated the outlet as the terms offered by the lessor for renewal were not favourable

Although the Company proposes to mitigate this risk by entering into lease agreements with a minimum tenure of two years for existing outlets and a lease period of five years for proposed outlets, there can be no assurance that the lease agreements will be renewed on favorable terms or at all.

7. Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years

(Rs. in lakhs)

Particulars	30-09-2025	31-03-2025	31-03-2024	31-03-2023

There can be no assurance that our net cash flows shall be positive in the future. Any negative cash flows in the future over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance and results of operations could be materially and adversely affected. For further details, see ***“Financial Statements as Restated”*** beginning on page 166 of this Prospectus.

8. *Our Company faces competition from established players. Our failure to effectively compete may reduce our profitability and results of operations.*

Our company is engaged in the business of trading of fruits and vegetables and contract farming, where we face intense competition from both organized players and established market participants. The industry includes large-scale agribusinesses, multinational corporations, and well-established supply chains that benefit from advanced logistics, cold storage facilities, and superior distribution networks. Many of these competitors have greater financial resources, technological advancements, and established brand recognition, which may give them a competitive edge over us.

Additionally, the increasing adoption of modern agricultural practices, advanced packaging, and improved post-harvest management techniques by larger players enables them to offer better quality and longer shelf-life products. As we primarily operate as traders and engage in contract farming rather than owning large-scale infrastructure or proprietary technology, we may find it challenging to compete with such players on factors like pricing, quality consistency, and supply chain efficiency.

9. *We may be subject to product liability claims from our customers. Any claims arising from such liabilities may harm our reputation, require us to incur substantial costs and/or have an adverse impact on our business, financial conditions and results of operations.*

We are subject to product liability claims with respect to quality and defects in our products. We will be required to comply with certain quality standards for the products we supply to the customers. In case we are unable to provide the prescribed quality standard products, we may lose our customers which could result in substantial business losses. However, we have not experienced any product liability claims with respect to quality and defects in our products in the past, which had material impact on the financial and result of operations of our company. In the event, our company fails to maintain the quality of its products or if there is any major defect in our products in future, we could be made liable to the customers and the same could consequently lead to a negative publicity against our Company thereby affecting our brand value, reputation, business, results of operations and financial condition. In the event, there are any liabilities arising from such claims, our business, financial performance and results of operations may be adversely affected. We cannot assure you that no such claims will be brought against us in the future or that such claims will be settled in our favour. Any such successful claims against us could adversely affect our business, financial condition and results of operations.

10. *The improper handling, processing or storage of our products or materials (both present or future), or spoilage of and damage to such products or materials, or any real or perceived contamination in our products or materials, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.*

Our products and materials (both present or future) are subject to risks such as spoilage, adulteration, product labelling error and product tampering during their, transport or storage. We cannot assure you that the quality tests conducted by our suppliers will be accurate at all times. Any shortcoming in the products or storage of our products due to negligence, human error or otherwise, may damage our products and result in non-compliance with applicable standards. Any actual or alleged damage of our products or materials could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis. However, our Company has not faced any instance of spoilage or any damage to such products or materials, which had material impact on the financial and result of operations of our Company. Any allegation

relating to, or the discovery of, unauthorized contaminants in our products or materials processed by us, which causes or is alleged to cause injury or illness, allegations that our products were mislabelled, were not produced in accordance with our customer's specifications and/or have not performed adequately, may adversely affect our sales and may cause product liability or other legal being initiated against us by our customers and/or regulatory authorities, irrespective of whether such allegations have any factual basis. We cannot assure you that we will not be subject to such product liability claims in the future, whether or not legitimate, or product recalls, whether voluntary or mandatory. Defending such claims or regulatory action could be time-consuming and may also result in unexpected expenditures, and our reputation, business, financial condition, cash flows and results of operations may be adversely affected.

11. Our Company faces a high employee attrition rate, which can negatively impact our business operations and growth.

Our Company is experiencing elevated levels of employee attrition, which may materially impact our operational efficiency, financial performance, and strategic growth objectives. High turnover rates increase costs associated with recruitment, onboarding, and training, while also leading to disruptions in workflow, delays in project execution, and reduced productivity.

The loss of highly skilled and experienced personnel can erode institutional knowledge, weaken service delivery, and impair our ability to sustain customer relationships and remain competitive within our industry. Persistent attrition challenges may also negatively affect workforce morale and hinder our capacity to attract and retain top-tier talent in a competitive labour market.

13. Our company is promoted by first generation entrepreneurs, and their limited experience and industry networks may affect our business growth and prospects.

Our Company is promoted by Mr. Ashokbhai Dhanaji Prajapati and Mr. Chirag Ashokbhai Prajapati. While Mr. Ashokbhai Dhanaji Prajapati has been involved in the industry since 2002. Investors and stakeholders may exercise caution when evaluating businesses as promoters may lack broader experience and established networks that seasoned entrepreneurs typically possess. Established entrepreneurs often benefit from extensive industry relationships and access to critical resources, which can facilitate partnerships, collaborations, and financing opportunities essential for growth. Accordingly, there can be no assurance that the limited experience or networks of our promoters will not adversely affect our business operations, financial condition, or growth prospect.

The promoters of the company Mr. Ashokbhai Dhanaji Prajapati and Mr. Chirag Ashokbhai Prajapati, are the first in their family to undertake business activities relating to trading of agricultural commodities and contract farming independently. They are not the original promoters of the Company. The company has takeover the partnership firm “Jay Chamunda Trading Co.” which was run by the promoters itself and now forming part of company operations. Their entrepreneurial experience has been self-built and not inherited from prior business generations

14. The use of pesticides and other hazardous substance in our operations may lead to loss of nutrients in the seeds produced and also may lead to environmental damage and result in increased costs.

Hybrid seed, weedicides and other products contain high usage of pesticides and other hazardous substance. We may also have to pay for the costs or damages associated with the improper application, accidental release or the use or misuse of these substances. In these cases, payment of costs or damages could have a material adverse effect on our business, results of operations and financial condition. Usage of our products such an increased quantity could lead to loss of nutrients in the seeds which makes them less attractive from that of organic seeds produced.

15. Our inability to maintain the stability of our distribution network and attract additional high quality dealers may have an adverse effect on our result of operations and financial conditions.

Company’s business operations relies heavily on an efficient distribution network, to ensure timely delivery of products to customers, which include wholesalers, retailers, and other market participants including e-commerce operators. The challenge in this industry lies in reaching a geographically dispersed customer base with perishable products while maintaining quality, freshness, and competitive pricing. Competition in the fruits and vegetables trading sector is intense, with multiple players, including organized retail chains, e-commerce platforms, and direct farm-to-market initiatives. Our ability to maintain strong relationships with our wholesalers, and key buyers is crucial to sustaining demand for our products. If our distribution partners do not find our offerings commercially viable or if there is a shift in market demand, it could impact our ability to effectively sell our products. Furthermore, our growth depends on expanding our distribution network and onboarding high-quality buyers and partners. There is no assurance that our current wholesalers, will continue to engage with us, or that we will be able to attract new partners in a highly competitive market. Any disruption in our distribution network or inability to expand our market reach could negatively impact our sales, market share, and overall financial performance.

16. Our ability to deliver our products in a timely manner is crucial to our business and results of operations.

Our business operations depends on our ability to source, transport, and deliver fruits and vegetables in a timely manner while maintaining their freshness and quality. Since these products are highly perishable, any delays in procurement or delivery could result in spoilage, increased wastage, and financial losses. Our supply chain is influenced by several external factors, including weather conditions, transportation availability, and logistical disruptions. Adverse weather events such as floods, droughts, storms, or unseasonal rainfall can affect crop yields, leading to fluctuations in supply and pricing. Additionally, unexpected pest infestations or plant diseases may impact product availability, making sourcing more challenging. We also rely on third-party transporters for the timely delivery of our products. Any disruptions due to factors such as vehicle unavailability, strikes, fuel price fluctuations, road conditions, accidents, or natural disasters may delay deliveries, impact product quality, and disrupt our supply chain. If we are unable to manage these risks effectively, it could adversely affect our operations, customer relationships, and overall financial performance.

17. Out of twenty, fifteen outlets which company is proposing to open is geographically concentrated in Ahmedabad, which exposes us to location-specific risks.

The Company proposes to open a total of twenty new outlets, of which fifteen are planned to be established in Ahmedabad, with the remaining five outlets proposed in other parts of Gujarat. This geographic concentration may expose us to region-specific risks, such as changes in local market conditions, economic downturns, regulatory changes, or increased competition within Ahmedabad. Moreover, limited diversification across other geographies may restrict ability to mitigate the impact of such region-specific risks. The Company seeks to mitigate such risks by continuously monitoring market conditions, diversifying store formats, and exploring opportunities to expand in other regions of Gujarat over time. However, there can be no assurance that these measures will fully prevent or protect against the occurrence of the aforementioned risks or their potential impact on the Company's business, financial condition, and results of operations.

18. Our outlets and godown currently operate without CCTV surveillance, absence of CCTV Camera at Outlets and Godown may pose security risks and adversely affect the company's operations and financial performance.

At present, our outlets and godown are not equipped with CCTV surveillance cameras. The absence of such systems may expose the Company to operational and security risks, including theft, loss of goods, or inability to verify incidents occurring at outlets. Although, the Company has not experienced such event till date, the Company recognizes the importance of installation of CCTV surveillance camera and shall mitigate the associated risks by installing CCTV surveillance cameras in all its new outlets going forward. However, despite the installation of CCTV surveillance systems in new outlets, there can be no assurance that such measures will completely eliminate the possibility of thefts, security breaches, or other unforeseen incidents. Any such event, if it occurs, may adversely affect the Company's business operations and financial performance.

19. Product defects, including substandard or contaminated products, if delivered to customers, may result in complaints, product returns, reputational damage, and potential legal claims, adversely affecting our financial performance and operations

The quality and freshness of our products are critical to our business success. Despite careful sourcing and quality checks, there is always a risk that some products may contain defects, contamination, or spoilage that are difficult to detect before distribution. Since our products are perishable, factors such as improper handling, temperature fluctuations, and delays in transportation can impact their quality. If substandard or contaminated products reach our customers, it could lead to complaints, product returns, reputational damage, and potential legal claims. Additionally, regulatory authorities may impose penalties or restrictions if our products are found to be unsafe or non-compliant with food safety standards.

Further, the quality and shelf life of our products depend on proper storage, handling, and transportation, which are often beyond our direct control once they leave our supply chain. Any perceived or actual defects in our products

could result in customer dissatisfaction, loss of business, and negative publicity, all of which could have a material adverse effect on our financial performance and operations.

20. In addition to normal remuneration, other benefits and reimbursement of expenses, some of our Directors (including our Promoter) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors (including our Promoter) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Promoter who are directors would always exercise their rights as shareholders to the benefit and best interest of our Company. As a result, our Promoter and Directors will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Promoter and Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Promoter and Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospect.

21. We have entered into related party transactions and may continue to do so in the future.

Our Company has entered into certain transactions with our related parties. While we believe that all such transactions have been conducted on the arms-length basis, there can be no assurance that we could not have been achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation.

For details on the transactions entered by us, please refer to “Related Party Transactions” beginning on page no. 163 of this Prospectus.

22. Our insurance coverage does not adequately protect us against losses (including damages or loss caused to the Products), and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.

Our insurance policies, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption, losses in transit, natural disasters etc. because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations

The principal types of insurance coverage of the company include: (i) Floater Stocks; (ii) Furniture & Fixtures, Fittings and Other Equipments; and Plant and Machinery (iii) Fire and Allied Perils (Building and Contents), Burglary and personal accident for employees. Notwithstanding the insurance coverage that we carry, we may not be fully insured against certain business risks. There are many events that could significantly impact our operations, or expose us to third-party liabilities, for which we may not be adequately insured.

Further, certain assets of the Company are not adequately insured, we could face liabilities or otherwise suffer losses should any unforeseen incident such as fire, flood, and accidents affect our premises. The following tables set forth details of coverage of our insurance policies against the total insurable assets.

(Rs. In Lakhs)

Particulars	Remarks	Amount as on September 30, 2025*	Percentage of Insurance Coverage
Insured Assets	Inventory	988.81	49.55%

	Fixed Assets	31.59	100%#
Uninsured Assets	Other Assets	1233.26	Nil
Total Assets		2253.66	

*As per Restated Financial Statements and net block of fixed assets

Since the fixed assets are insured against various risks, the cumulative total of sum assured of all such insurance policy is more than the asset value and thus the percentage of insurance coverage is shown as 100%

While we periodically review Company's insurance requirements to ensure adequate coverage, we cannot guarantee that all losses or claims will be fully covered under the existing policies. We have not faced any material instances of uninsured losses or rejection of insurance in the three preceding financial years.

23. We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when it became due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated as mentioned in the agreement with our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations. We are exposed to counterparty credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. The financial condition of our clients, business partners and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could affect our financial condition, results of operations and cash flows.

24. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

Our future ability to pay dividends will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

25. Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.

The operations of the Company are carried in the state of Gujarat. Due to the geographical concentration of our major clients, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations. In addition, we generate major domestic sales through our customers situated in, Gujarat region. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and result of operations.

26. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

27. Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.

Our business involves the trading of perishable agricultural commodities such as fruits and vegetables, which require timely and efficient transportation. We rely primarily on third-party logistics service providers for the movement of goods from suppliers to our godown and onward to customers. Any disruption in logistics operations due to factors such as vehicle unavailability, strikes, adverse weather conditions, road closures, fuel price fluctuations, or regulatory changes could lead to delays in delivery, deterioration in product quality, or rejection of goods by customers. Although we seek to mitigate these risks by engaging multiple logistics partners and structuring commercial terms where transportation costs are shared with suppliers or customers, there can be no assurance that such arrangements will always be effective or sufficient to fully cover cost escalations or avoid service interruptions. Our inability to maintain consistent and cost-effective logistics services may materially and adversely affect our operations, financial performance, and customer relationships.

28. Delays or defaults in client payments could affect our operations.

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

29. Our operations are subject to high working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our results of operations.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards raw material procurement, debtors and inventories. Presently we meet our working capital needs from internal accruals and banking arrangements. In future, our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. In case of any such defaults from our debtors, it may affect our business operations and financials.

For further details regarding working capital requirement, please refer to the section ***“Objects of the Issue”*** on page 82 of this Prospectus.

30. The deployment of funds raised through this Issue is subject to Monitoring Agency and shall also be dependent on the discretion of the management of our Company.

Monitoring agency be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders

being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — “Objects of the Issue” on page 82 of the Prospectus.

31. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

Our promoters along with the promoter group will continue to hold collectively 68.54 % of the Equity share capital of the Company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder’s vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our Company. In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

32. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy. Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company’s Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company’s Equity Shares.

33. We have availed unsecured loans from our Promoters that can be recalled at any time, such demand may materially and adversely affect our business, cash flows, financial condition and results of operations.

Our Company has availed unsecured loans of Rs. 9.99 lakhs as of September 30, 2025 that are repayable on demand and which may be recalled by such lenders at any time. Details of unsecured loans from our Promoters is given in the table below.

Particulars	Amount (in Rs. Lakhs)	Rate of Interest	Tenure/Repayment Terms	Security
<i>Mr. Ashokbhai Dhanajibhai Prajapati</i>	2.85	0%	Repayable on Demand	Unsecured
<i>Mr. Chirag Ashokbhai Prajapati</i>	7.14	0%	Repayable on Demand	Unsecured
Total	9.99			

In the event that such lender seeks repayment of any such unsecured loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of

operations. For further information on unsecured loans relating to our business and operations, see “Financial Indebtedness” on page 169.

34. Our company has not complied with certain statutory provisions with respect to filing forms of the Companies Act. Such non-compliance may attract penalties and prosecution against our Company and its Directors which could impact the financial position of us to that extent.

Our Company is required to make filings under various rules and regulations as applicable under the Companies Act, 2013. Further, few forms have not been filed within the stipulated time period. Although no show cause notice has been issued against the Company till date in respect of above, such delay, noncompliance may in the future render us liable to statutory penalties and could have serious consequences on our operations. Reasons for delay in filings include technical lapses and human errors, including oversight in timelines and coordination challenges faced by the company. The delays were inadvertent and unintentional, and on each occasion, the Company has promptly paid the requisite additional fees and penalty and made the filings to regularize the compliance. To mitigate the risk of future delays, the Company has appointed a Company Secretary (CS) for statutory compliance and filings, implemented an internal compliance system to track all filing requirements, and monitor deadlines and coordinate with professional advisors. In addition, personnel are being trained on timely compliance and statutory obligations. These measures are expected to strengthen compliance and minimize the risk of non-compliance going forward.

35. *There have been certain inadvertent inaccuracies, delay and non-compliances with respect to certain regulatory filings and corporate actions taken by our Company. Consequently, we may be subject to regulatory actions and penalties for any past or future non-compliance and our business and financial condition may be adversely affected.*

Our Company has defaulted in filing of the return under Employees' State Insurance Act, 1948 (ESIC). There was a delay of 15 days in the payment of Contribution under the regulation 31 of the Employees' State Insurance (General) Regulations, 1950 for the month of Nov-2024 and the delay in payment and filing the return under ESIC was not committed deliberately. The total number of employees of the Company is 17. ESIC filings have been made for 7 employees whose wages fall within the statutory ESIC coverage limit of ₹21,000 per month. The remaining employees are not covered under ESIC because of their wages exceed the limit.

In the past, our company has delayed in filing GST returns and TDS returns, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues. The details of the delays in filing return by the company are as under:

36. *If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.*

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Although we have obtained all the requisite licenses to operate our business, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations, including any expansion of existing operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals upon their expiry in a timely manner or at all. We also cannot assure you that the applicable authorities shall not take adverse actions against us for delayed application for the aforementioned approvals. Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this non-compliance. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company, see ***"Government and Other Approvals"*** beginning on page 183.

37. *Our Company has applied for registration of the trademarks in its name. Until such registration is granted, we may not be able to prevent unauthorized use of such trademarks by third parties, which may lead to the dilution of our goodwill*

Our Company has applied for the registration of its logo "  " under Class 31 of the Trade Marks Act, 1999, through an application dated September 21, 2024. As of now, the status of the application is "Formality Check Pass." However, there is a possibility that the application may be objected to in the future. There is no assurance that we will be able to successfully obtain registration or overcome any objections that may arise. If we are unable to

address such objections, renew the registration, or if a third party registers or uses a similar or identical mark in India or abroad, we may not be able to claim exclusive rights over the trademark. Consequently, this could limit our ability to seek legal remedies for infringement, except for relief against passing off, which may impact our business prospects, reputation, and goodwill. Failure to register or renew the trademark could also affect our rights to use it in the future.

Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third party claim on any of our unprotected intellectual property may lead to erosion of our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered brand name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad.

Further, if do not maintain our brand name and identity, which we believe is one of the factors that differentiates us from our competitors, we may not be able to maintain our competitive edge in India and abroad. If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability. Moreover, our ability to protect, enforce or utilize our brand name is subject to risks, including general litigation risks. Furthermore, we cannot assure you that such brand name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source in India and abroad. Any damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position in India and abroad. For further details see “*Our Business*” and “*Government and Other Statutory Approvals*” beginning on pages 112 and 183, respectively of this Prospectus.

38. Our Business is dependent on adequate and uninterrupted supply of electrical power and water at a reasonable cost. Failure on account of unavailability of electrical power and water may restrict us in utilizing our full capacity and hence, may impact our business and result of operations.

Adequate and cost-effective supply of electrical power is critical to our operations, which entails significant consumption of electrical power. Currently, we source power requirements by purchasing electricity from Torrent Power Limited (TPL) but there can be no assurance that electricity supplied by them will be sufficient to meet our requirements or that we will be able to procure adequate and interrupted power supply in the future at a reasonable cost. Further, if the per unit cost of electricity is increased by the state electricity board, our power costs will increase and it may not be possible to pass on any increase in our power costs to our customers, which may adversely affect our profit margins. We source our water requirements at our contract farming land by procuring the same from Garm panchayat. Lack of sufficient water resources or an increase in the cost of such water used at contract farming land could adversely affect our business, financial condition and results of operations.

39. None of our Directors does not have prior experience of being a Director of a Listed Company, which may expose us to compliance and governance risks.

None of our Directors have prior experience of being a directors/ holding directorship of listed companies. Accordingly, they have limited exposure as regards managing the affairs of a listed company which inter-alia entails several compliance requirements and scrutiny of affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, our Company will be required to adhere strict standards pertaining to accounting, corporate governance and reporting that it did not require as an unlisted company. Our Company will also be subject to the SEBI Listing Regulations, which will require it to file audited annual and unaudited quarterly/half yearly reports with respect to its business and financial condition. If the Company experiences any delays, we may fail to satisfy the reporting obligations. Further, as a publicly listed company, our Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our Company’s disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, the Board of our Company may have to provide increased attention to such procedures and their attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition.

40. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “*Objects of the Issue*” beginning on page 82 of this Prospectus.

41. The acquisition targets for our proposed retail outlets have not been identified, which may delay deployment of Issue proceeds and implementation of our expansion plan..

Our Company proposes to utilize a portion of the Net Proceeds from the Issue towards setting up 20 retail outlets. While we have identified the target areas or regions where these outlets are proposed to be established, the specific locations and premises within those areas have not been finalized as on the date of this Prospectus. The process of identifying and securing suitable properties, and entering into lease or rent agreements, is currently underway. Any delay or inability to finalize such agreements on commercially viable terms may impact the timely execution of our expansion strategy and result in deferment in the utilization of the Issue proceeds.

42. The average cost of acquisition of Equity Shares by our Promoter may be less than the Issue Price.

The average cost of acquisition of Equity Shares by our Promoters may be less than the Issue Price. The details of average cost of acquisition of Equity Shares acquired by our Promoters is set out below:

Sr. No.	Name of Promoters	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹)
1.	Ashokbhai Dhanajibhai Prajapati	28,60,020	9.22
2.	Chirag Ashokbhai Prajapati	62,70,827	11.95

**The average cost of acquisition of Equity Shares by Promoters have been calculated by taking into account the amount paid by them to acquire and Shares allotted to them as reduced by amount received on sell of shares i.e., net of sale consideration is divided by net quantity of shares acquired. For more information, please refer to the section titled on “*Capital Structure*” page no 69 of the Prospectus.*

43. Wage increases in India may reduce our profit margins.

We are highly dependent upon availability of skilled and semi-skilled labour. Wages and other compensation paid to our employees is one of our significant operating costs, and an increase in the wages or employee benefit costs will significantly increase our operating costs. Because of rapid economic growth in India and increased competition for skilled and semiskilled employees in India, wages for comparable employees in India are increasing at a fast rate. We may need to increase the levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining the quality and number of skilled and semi-skilled employees that our business requires. Further, many of our employees receive salaries that are linked to minimum wage laws in India and any increase in the minimum wage in any state in which we operate could significantly increase our operating costs. In addition, a shortage in the labour pool or other general inflationary pressures or changes will also increase our labour costs. Wage increases in the long-term may reduce our competitiveness and our profitability.

44. The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.

The company’s operating results may fluctuate or adversely vary from past performances in the future due to a number of factors, many of which are beyond the company’s control. The results of operations during any financial year or from period to period may differ from one another or from the expected results of operation. Its business, results of

operations and financial condition may be adversely affected by, inter alia, a decrease in the growth and demand for the services offered by the us or any strategic alliances which may subsequently become a liability or non-profitable. Due to various reasons including the above, the future performance may fluctuate or adversely vary from our past performances and may not be predictable. For further details of our operating results, section titled ***“Financial Statements as Restated”*** beginning no page 166 of this Prospectus

45. *We rely significantly on supplier-managed cold storage and warehousing facilities in addition to our own godown, and any inadequacy in such facilities could lead to product spoilage, increased costs, and reputational harm.*

The Company owns and operates one godown; however, a significant portion of our inventory, particularly cold storage for perishable agricultural products, is maintained at supplier-managed facilities. Given the nature of the products we handle, proper cold storage is critical for preserving quality and minimizing losses. Any shortfall in storage conditions such as temperature control failure, lack of hygiene, pest infestation, or improper handling could result in product spoilage, wastage, and inventory losses. To address these risks, we engage with suppliers who have established storage infrastructure and we monitor compliance with agreed standards where feasible. However, since these facilities are not owned or directly controlled by us, we have limited oversight. In addition, storage costs borne at supplier locations are factored into our procurement pricing and may fluctuate based on market dynamics. Our dependence on third-party storage, especially for perishable goods, may expose us to operational risks, increased costs, and potential damage to our reputation, which could adversely affect our business, financial condition, and results of operations.

46. *The Company is yet to place 100% orders for the Machinery for our proposed object, as specified in the Objects of the Issue. Any delay in placing orders, procurement may delay our implementation schedule and may also lead to increase in price of these plant & machinery, further affecting our revenue and profitability.*

Although we have identified the type of equipment, furniture and fixtures required to be bought for our 20 retail outlets however, we are yet to place 100% orders for the equipment's, furniture and fixture worth Rs 17.89 lakhs for each outlet (Amounting to Rs. 357.87 lakhs for 20 retail outlets) as detailed in the “Objects of the Issue” beginning on page 82 of this Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, changes in management's views of the desirability of current plans, among others which may have an adverse effect on our business and results of operations. Further, we cannot assure that we would be able to procure these, or procure the same within budgeted costs and timelines. Delays in acquisition would have a material adverse effect on our business, results of operations and financial condition.

47. *Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.*

We propose to utilize the Net Proceeds for raising funds for capital expenditure, working capital Requirement and general corporate purpose. For further details of the proposed objects of the Issue, please refer the chapter titled “Objects of the Issue” beginning on Page No. 82 of this Prospectus. At this juncture, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoter or controlling shareholders to provide an exit opportunity to such dissenting shareholders of our Company may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

48. *We have not independently verified certain data in this Prospectus.*

We have not independently verified data from the industry and related data contained in this Prospectus as mentioned under chapter 'Industry Overview' on page 98 and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. 49. *If we are unable to successfully implement our proposed expansion plans; our results of operations and financial condition could be adversely affected.*

Our Company is planning to scale-up and expand its business operations and to promote brand. Our company is proposing to open 20 (Twenty) Retail Outlets for brand 'STANBIK AGRO LIMITED' in the state of Gujarat with an estimated aggregate built up area of 900 sq.ft. to 1,000 sq.ft. per retail outlets ("Average Size"). The total estimated cost to operate these 20 (Twenty) Retail Outlets is Rs. 17.89 Lakhs (Rupees Seventeen Lakhs Eighty Nine Thousand Only). From the Net Proceeds of the Issue, we will be deploying funds for interior work (which includes, among others, Sign board, painting work, civil, plumbing, tiles, sanitary wares, CP fittings, wiring, CCTV, lights & fittings, fan, air conditioner, refrigerator for vegetable display, vegetable display rack, Home delivery vehicle electric, billing machine, glass door, vegetable crate etc.) and all required furniture's (includes counter, storage space, wooden racks). These expansion plans and business growth could strain our managerial, operational and financial resources. Our ability to manage future growth will depend on our ability to continue to implement and improve operational, financial and management information systems on a timely basis and to attract, expand, train, motivate, retain and manage our workforce.

We cannot assure you that our personnel, systems, procedures and controls will be adequate to support our future growth. Failure to effectively manage our expansion may lead to increased costs and reduced profitability and may adversely affect our growth prospects. Any of these factors may cause us to delay, modify or forego some or all aspects of our expansion plans. Further, there can be no assurance that we will be able to execute our strategies on time and within the budget estimated by the Company. In addition, our expansion plans have not been appraised by any independent or third-party agency, and accordingly, in the absence of such independent appraisal, our expansion plans may be subject to change based on various factors which are beyond our control.

50. *Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute upto 119.76 lakhs of the Issue Proceed. As on date we have not identified the use of such funds.*

Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute upto 119.76 lakhs of the Issue Proceed. We have not identified the general corporate purposes for which these funds may be utilized. The deployment of such funds is entirely at the discretion of our management in accordance with policies established by our Board of Directors from time to time and subject to compliance with the necessary provisions of the Companies Act. For details please refer the chapter titled "Objects of the Issue" beginning on Page No. 82 of this Prospectus.

51. *There is no assurance that the Equity Shares issued pursuant to the Offer will be listed on the BSE SME Platform of BSE Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for the listing and trading of the Equity Shares issued under the Issue will only be granted after the Equity Shares have been issued and allotted. Approval for listing and trading will be subject to the submission of all necessary documents authorizing the issuance of the Equity Shares. There may be delays or failures in listing the Equity Shares on the SME Platform of BSE Limited. Any such delay or failure to obtain approval could limit your ability to sell or transfer your Equity Shares.

52. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, for funding our working capital requirements, primarily, as detailed in the chapter titled “Objects of the Issue” beginning on page 82 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

53. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The issue price of the equity shares has been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the chapter titled “Basis for Issue Price” beginning on 92 of the Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

54. Any future issuance of Equity Shares may dilute the shareholding of the Investor or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire post-Issue paid-up share capital, held by our Promoters or other shareholders will be locked-in for a period of 1 (One) year and minimum promoter contribution subject to a minimum of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (Three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled “***Capital Structure***” beginning on page 69 of the Prospectus. Any future issuance or sale of the equity shares of our Company by our Promoter or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

55. Sale of shares by our promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

The sale of shares by the promoters or other significant shareholder(s) may significantly affect the trading price of our Equity shares. Further the market price generally may be adversely affected on account of the news about the sale of shares by the promoters. However, the closing of trading windows during the period of financial results may restrict the promoters from selling the shares in the open market.

56. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder’s ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

57. Limited or sporadic trading of specified securities of the Company on the Stock Exchanges

Our equity shares have experienced limited or sporadic trading on the stock exchanges in the past. The trading volume and liquidity of our specified securities may be limited and may not reflect the underlying value of our Company. There can be no assurance that an active and liquid market for our securities will develop or be sustained after the Issue. Limited trading may result in reduced investor interest and may also lead to greater volatility in the market price of our securities. This could make it difficult for investors to sell their securities at or near the quoted price or at all, at any given time. Additionally, such illiquidity may impact our ability to raise further capital in the future through the capital markets. Investors should note that the market price of our equity shares could be subject to significant fluctuations due to factors both related and unrelated to our Company's performance, including general market conditions, macroeconomic developments, industry-specific trends, and speculation in the market. Accordingly, past trading history should not be considered as an indicator of future market performance, and there can be no assurance that an active trading market will develop or be sustained post-listing.

58. Our operating results may fluctuate significantly and could fall below the expectations of securities analysts and investors due to various factors.

Our operating results may fluctuate significantly because of various factors, including changes in comparable store sales and customer orders, including as a result of declining consumer confidence or the introduction of new menu items; the timing of new store openings and related revenues and expenses; labour availability and wages of store management and crew; profitability of our stores; variations in general economic conditions, including the impact of declining interest rates on our interest income; negative publicity about the ingredients we use or the occurrence of food-borne illnesses or other problems at our stores; changes in consumer preferences and discretionary spending; and fluctuations in supply prices. As a result of these factors, results for any one quarter are not necessarily indicative of results to be expected for any other quarter or for any year. Average store sales or comparable store sales in any particular future period may decrease. In the future, operating results may fall below the expectations of securities analysts and investors, which could cause our stock prices to fall.

59. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters
- Other significant regulatory or economic developments in or affecting India or its agrochemical industry

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

EXTERNAL RISK FACTORS:

60. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ('IFRS'), which investors may be more familiar with and consider material to their assessment of our financial condition.

The Financial Statements of our Company for the Financial Year ending March 31, 2025, March 31, 2024, and March 31, 2023, and for the six months ended on September 30, 2025 have been prepared in accordance with the Indian GAAP, the Companies Act, 2013.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Indian GAAP. Accordingly, the degree to which the Financial Information included in this prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian GAAP and the SEBI (ICDR) Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this prospectus should accordingly be limited.

61. Political, economic, or other factors that are beyond our control may have adversely affect our business and results of operations.

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition, and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional, and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional, and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, and volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

62. A slowdown in economic growth in India could cause our business to suffer.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- (a) Any increase in Indian interest rates or inflation;
- (b) Any scarcity of credit or other financing in India;
- (c) Prevailing income conditions among Indian consumers and Indian corporations;
- (d) Changes in India's tax, trade, fiscal or monetary policies;

- (e) Political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- (f) Prevailing regional or global economic conditions; and
- (g) Other significant regulatory or economic developments in or affecting India.

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

63. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects, and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016, notifying Income Computation and Disclosure Standards (hereinafter referred to as 'ICDS'), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

The General Anti Avoidance Rules (hereinafter referred to as 'GAAR') have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

A comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

64. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance, and the trading price of the Equity Shares.

65. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

66. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing

indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

67. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

68. We are subject to regulatory, economic, social, and political uncertainties and other factors beyond our control.

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability, and other political and economic developments affecting India

INDIAN ECONOMY

INTRODUCTION

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for FY25 is estimated at Rs. 33.10 lakh crore (US\$ 3.8 trillion) with growth rate of 9.9%, compared to Rs. 30.12 lakh crore (US\$ 3.5 trillion) in FY24. Strong domestic demand for consumption and investment, along with Government’s continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY25. In FY25, India’s exports stood at Rs. 37.31 lakh crore (US\$ 433.56 billion), with Engineering Goods (26.88%), Petroleum Products (13.86%) and electronic goods (8.89%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the

next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

Real GDP for FY25 is estimated at Rs. 187.95 lakh crores (US\$ 2.2 trillion) with growth rate of 6.5%, compared to Rs. 176.51 lakh crore (US\$ 2.06 trillion) for FY24. As on Jan 2025, there are 118 unicorn startups in India, with a combined valuation of over Rs. 3.0 lakh crore (US\$ 354 billion). The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero

Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD) stood at Rs. 98,095 crore (US\$ 11.5 billion) for Q3 of FY25 as compared to Rs. 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

 - According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
 - Foreign Institutional Investors (FII) inflows in FY25 were close to Rs. 1.27 lakh crore (US\$ 14.89 billion), while Domestic Institutional Investors (DII) bought Rs. 6.00 lakh crore (US\$ 70.34 billion) in the same period.
- India's wheat procurement rose 34% YoY, reaching 22.36 MT as of April 28, 2025, with target of 31 MT in sight. Strong MSP, bonuses, and robust crop output boost sales to government agencies, ensuring food security and potential for open market intervention.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10.0 % to Rs. 11.21 lakh crore (US\$ 131.42 billion) over Rs. 10.18 lakh crore (US\$ 119.34 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total exports of goods and services rose by 5.5% to a record Rs. 69.8 lakh crore (US\$ 820.9 billion) in FY25, compared to Rs. 65.8 lakh crore (US\$ 773.0 billion) in FY24.

With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

AGRICULTURE AND ALLIED INDUSTRIES INDUSTRY REPORT

INTRODUCTION

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India's population. India has the world's largest cattle herd (buffaloes), the largest area planted for wheat, rice, and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. The agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country's population. Thus, farmers become an integral part of the sector to provide us with a means of sustenance.

Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry.

The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

Foodgrain production in India touched 330.5 million metric tonnes (MT) in 2022-23 (3rd Advance Estimate). India is the world's 2nd largest producer of food grains, fruits and vegetables and the 2nd largest exporter of sugar. A total of 521.27 LMT rice has been anticipated for procurement for the upcoming KMS 2023-24, up from 496 LMT produced during the previous KMS 2022-23.

GOVERNMENT INITIATIVES

Fruits and vegetables are significant components of the agricultural and industrial economies. Due to their significance for the country's economic growth, the government has announced several changes to improve opportunities in the fruits and vegetables industry and encourage exports. Some of these reforms are listed below:

- **100% Foreign Direct Investment (FDI) permitted for the food processing sector:**
The government had approved 100% FDI under the automatic route in the food processing sector. The intention was to make the FDI policy more investor friendly and remove the policy blockages hampering the investment inflows into the industry and the country.
- **Agriculture Export Policy (AEP):**
The Government of India released its Agriculture Export Policy in 2018, emphasising agriculture export-oriented production, export promotion, greater farmer realisation, and synchronisation with government policies and programmes. The AEP places importance on farmer-focused mobile applications. During implementation of AEP, considerable progress has been made in giving Farmer-Produce Organizations (FPOs) and farmers a stake in the export of their produce. Due to the need to serve foreign markets, direct connectivity of FPOs/farmers with the export market has boosted farmers' incomes and led to better farming practices.

Direct Involvement of Farmers in Exports:

- **Farmer Connect Portal** – On the Agricultural and Processed Food Products Export Development Authority (APEDA) website, a Farmer Connect Portal has been created to provide FPOs/ Farmer Producer Companies (FPCs) and cooperatives a platform to communicate with exporters. There are currently 2,360 FPOs/FPCs and 2,324 exporters registered in the portal.
- **Traceability Systems** – Traceability to the farm level is essential to guarantee the quality of exports and establish India as a trustworthy provider of high-quality goods. Many digital platforms for traceability have been created to facilitate easy business flow and ensure system transparency.
- **HortiNet-Mango:** More than 38,000 farmers and over 66,000 farms have been registered.
- **HortiNet-Vegetables:** The system covers 43 vegetables. To date, over 10,000 farmers and 10,000 farms have been registered.
- **HortiNet-Citrus Fruit:** This system was implemented in July 2018. So far, a large number of farmers and farms have been registered.
- **Addressing Transport and Logistics Issues:**
 - In order to help farmers and producers transport their [agricultural products](#) from rural areas to major towns and cities, the Indian Railways has introduced the Kisan Rail service, under which trains are run with multiple commodities (perishables, agriproducts and seeds), consignors and consignees. The Indian Railways has run 157 Kisan Rail services on 18 routes thus far to transport perishable goods such as fruits, vegetables and other foods. The Ministry of Food Processing Industries (MoFPI)'s Operation Greens (TOP to TOTAL) programme provides 50% subsidy on the Kisan Rail delivery of fruits and vegetables

ROAD AHEAD

The agriculture sector in India is expected to generate better momentum in the next few years due to increased investment in agricultural infrastructure such as irrigation facilities, warehousing, and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to the concerted effort of scientists to get early maturing varieties of pulses and the increase in minimum support price.

In the next 5 years, the central government will aim US\$ 9 billion in investments in the fisheries sector under PM Matsya Sampada Yojana. The government is targeting to raise fish production to 220 lakh tonnes by 2024-25. Going forward, the adoption of food safety and quality assurance mechanisms such as Total Quality Management (TQM) including ISO

9000, ISO 22000, Hazard Analysis and Critical Control Points (HACCP), Good Manufacturing Practices (GMP), and Good Hygienic Practices (GHP) by the food processing industry will offer several benefits.

Through the Ministry of Food Processing Industries (MoFPI), the Government of India is taking all necessary steps to boost investments in the food processing industry in India. Government of India has continued the umbrella PMKSY scheme with an allocation of Rs. 4,600 crore (US\$ 559.4 million) till March 2026.

Food Safety and Standards Act, 2006 (“FSSA”):

The Food Safety and Standards Act, 2006 (the “FSSA”) was enacted on August 23, 2006 with a view to consolidate the laws relating to food and to establish the Food Safety and Standards Authority of India (the “Food Authority”) for setting out scientific standards for articles of food and to regulate their manufacture, storage, distribution, sale and import to ensure availability of safe and wholesome food for human consumption. The Food Authority is required to provide scientific advice and technical support to the Government of India and the state governments in framing the policy and rules relating to food safety and nutrition. The standards prescribed by the FSSAI include specifications for ingredients, contaminants, pesticide residue, biological hazards and labels. Under section 31 of the FSSA, no person may carry on any food business except under a license granted by the FSSAI. The FSSA sets forth the requirements for licensing and registering food businesses in addition to laying down the general principles for safety, responsibilities and liabilities of food business operators. The enforcement of the FSSA is generally facilitated by ‘state commissioners of food safety’ and other officials at a local level. The provisions of the FSSA require every distributor to be able to identify any food article by its manufacturer, and every seller by its distributor that should be registered under the FSSA and every entity in the sector is bound to initiate recall procedures if it finds that the food marketed has violated specified standards. Food business operators are required to ensure that persons in his employment do not suffer from infectious or contagious diseases. The FSSA also imposes liabilities upon manufacturers, packers, wholesalers, distributors and sellers requiring them to ensure that inter alia unsafe and misbranded products are sold or supplied in the market.

The Food Authority has also framed the following food safety and standards regulations:

- Food Safety and Standards (Licensing and Registration of Food Business) Regulations, 2011;
- Food Safety and Standards (Packaging and Labelling) Regulations, 2011;
- Food Safety and Standards (Food Product Standards and Food Additives) Regulations, 2011;

- Food Safety and Standards (Contaminants, Toxins and Residues) Regulations, 2011; and
- Food Safety and Standards (Laboratory and Sampling Analysis) Regulations, 2011.

Further, FSSAI has issued guidance note on 'Food Hygiene and Safety Guidelines for Food Businesses during Coronavirus Disease (COVID-19) Pandemic' ("Guidance Note") with an intent to provide guidance to food businesses, including their personnel involved in handling of food and other employees to prevent spread of COVID-19 in the work environment and any incidental contamination of food/food packages. It also provides guidance in relation to operative mechanism such as establishment of an in-house emergency response team in large food businesses to deal with suspected infections effectively. It mandates that employers should have a COVID-19 screening protocol in place to screen all personnel entering the premise. All the employees or visitors should be screened at entry point for the symptoms of COVID-19 such as, among others, temperature (using non-contact type thermometer), cough, cold etc. The entrance shall mandatorily have measures installed for hand hygiene. Employees and food handlers should be encouraged to self-declare any symptoms of any respiratory illness before visiting the premises. To spread awareness and contain the spread of the disease, employers should employ and ensure compliance with numerous measures such as, among others, display of posters/standees/audio visuals on preventive measures for COVID-19, frequent usage of alcohol-based sanitizers, avoidance of close contact with symptomatic personnel, usage of face masks, and frequent cleaning and disinfection. Food sectors involved in food services, takeaways and deliveries shall ensure, among others, that the food service area shall be thoroughly cleaned and disinfected after every meal, hand wash facilities should be made available to the workers, employees wear a clean uniform, mask/ face cover, gloves and head covers at all time, adoption of contactless delivery. The Guidance Note prescribes guidelines for the management of the food establishment to handle a Covid-19 suspect/positive case in accordance with the guidelines issued by Ministry of Health and Family Welfare and clean and disinfect the premises accessed by the suspected Covid-19 case.

The FSSAI has also framed the Food Safety and Standards Rules, 2011 (the "FSSR") which have been operative since August 5, 2011. Deferred tax is the tax expected to be payable or recoverable on differences between the carrying value of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets should be recognised only to the extent that there is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realised,

However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

RESTRICTIONS OF FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “automatic route”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “government route”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails.

RBI has also issued Master Direction- Foreign Investment in India dated January 4, 2018. In terms of the Master Direction, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “U.S. Securities Act”), or the securities laws of any state of the United States and may not be offered or sold within the United States, except pursuant to exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold only outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sale occur. The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

Our Company and the Lead Manager are not liable for any amendments or modifications or changes in applicable laws or regulations, which may occur after the date of this Prospectus. Applicants are advised to consult their legal counsel, to make their independent investigations and ensure that Applications are not in violation of laws or regulations applicable to them and do not exceed the applicable limits under the laws and regulations.
